

LILIAN CHIDERA AMADIKE

Toronto, ON | chideramadike@gmail.com | (+1) 647-712-2635 | github.com/deralili | linkedin.com/in/chidera-amadike-513318216/

PROFESSIONAL SUMMARY

Data Science & Analytics graduate with a First Class Honours degree in Computer Engineering and hands-on experience across data analysis, machine learning, business intelligence, and reporting. Proficient in Python, SQL, Power BI, Tableau, and Excel, with experience transforming complex datasets into clear dashboards, predictive insights, and actionable recommendations for business stakeholders.

SKILLS

- Analytics & Reporting: Power BI, Tableau, KPI Reporting, Dashboard Development, Data Visualization
- Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Trend Analysis, Data Validation
- Programming & Data: Python, SQL, pandas, NumPy, PostgreSQL, MySQL
- Machine Learning: scikit-learn, Classification, Regression, Feature Engineering, Model Evaluation
- Business Tools: Microsoft Excel (Pivot Tables, VLOOKUP/XLOOKUP, Power Query), PowerPoint, Word
- Data & Process: ETL, Data Modeling, Data Warehousing, Requirements Gathering, Stakeholder Communication, Git

EXPERIENCE

Data Analyst Intern | New Horizon

Aug 2024 - Jul 2025

- Analyzed and processed datasets containing 10K-100K+ records using Python and SQL to support business analytics workflows.
- Cleaned, transformed, and validated data to improve data quality and reporting consistency.
- Conducted exploratory data analysis to identify trends, anomalies, and performance patterns.
- Built and evaluated regression and classification models and developed analytical dashboards and recurring reports.
- Collaborated with cross-functional stakeholders to gather requirements, understand business needs, and communicate actionable findings.

PROJECTS

Customer Shopping Behavior Analytics

- Completed an end-to-end analysis of Brazilian e-commerce customer behavior using Python/Jupyter and Power BI, covering exploratory analysis, RFM segmentation, customer lifetime value, retention, and predictive modeling.
- Analyzed R\$13.22M in delivered-order revenue across 93,358 unique customers and found that the VIP CLV segment generated 62.53% of revenue.
- Built a leakage-safe time-based repeat-purchase model; selected expanded Logistic Regression for ranking performance (ROC-AUC 0.583, PR-AUC 0.0247, recall 53.57%).
- Developed a three-page Power BI dashboard covering executive KPIs, customer and retention analytics, and predictive analytics.

Bank Loan Lending Data Analytics

- Analyzed banking and loan application datasets to identify loan repayment trends and borrower risk segments.
- Built Tableau dashboards tracking lending KPIs including funded amount, interest rates, and debt-to-income ratios.
- Used SQL and Python to analyze loan performance by loan status, term, employment length, and borrower profile.

EDUCATION

Toronto Metropolitan University | MSc, Data Science & Analytics

2026

Afe Babalola University | BEng, Computer Engineering - First Class Honours

2019 - 2024

CERTIFICATIONS

- WorldQuant University - Applied Data Science Lab
- New Horizons Data Science Certification
